Methodology

Here is my methodology. . .

Econometric Model

Here is the equation of my econometric model:

$$Per_{it} = \beta_0 + \beta_1(X1_{t-1}) + \beta_2(X2_{t-1}) + \varepsilon_{it} \tag{1}$$

Dans l'Equation 1, blabla ou dans l'équation 1

where :
β_0 is the intercept,
β_1 is not the intercept.
